

# Proteus Installation Guide

Step 1: Download the Proteus installer from the link provided on Canvas & double click on “exe” file to run.

Step 2: This will launch the “Setup Wizard” window shown in Fig. 1(a). Click “Next” to proceed.

Fig. 1(a): Step 2

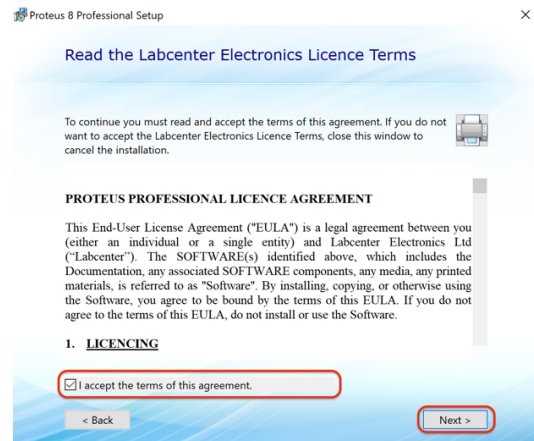

Fig. 1(b): Step 3

Step 3: This will launch the “License Terms” window shown in Fig. 1(b). Tick the checkbox next to “I accept the terms of this agreement” and then click “Next” to proceed.

Step 4: This will launch the “Setup Type” window shown in Fig. 2(a). Tick the radial button next to “Use a cloud or server based license key” and then click “Next” to proceed.

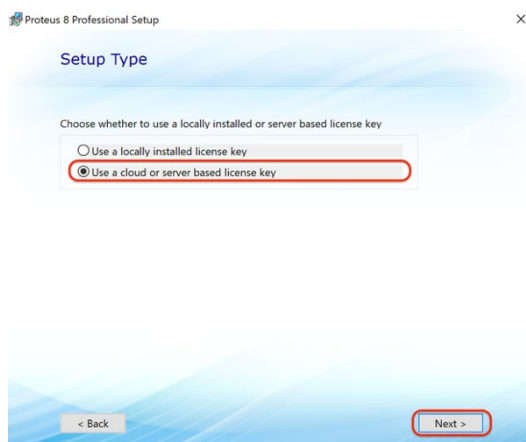

Fig. 2(a): Step 4

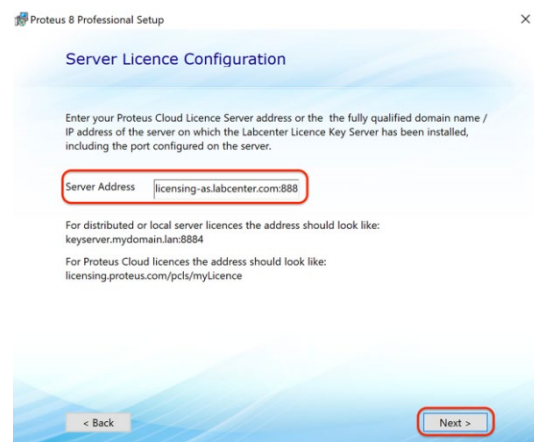

Fig. 2(b): Step 5

Step 5: This will launch the “License Configuration” window shown in Fig. 2(b). Enter the link given below in the text field for the “Server Address” and then click “Next” to proceed.

Step 6: This will launch the “Import” window shown in Fig. 3(a). Make sure none of the checkboxes are ticked and click “Next” to proceed.

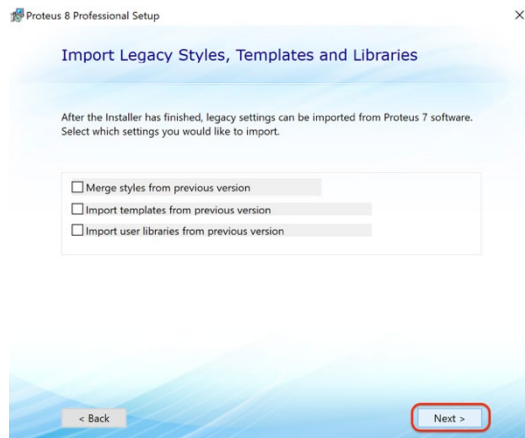

Fig. 3(a): Step 6

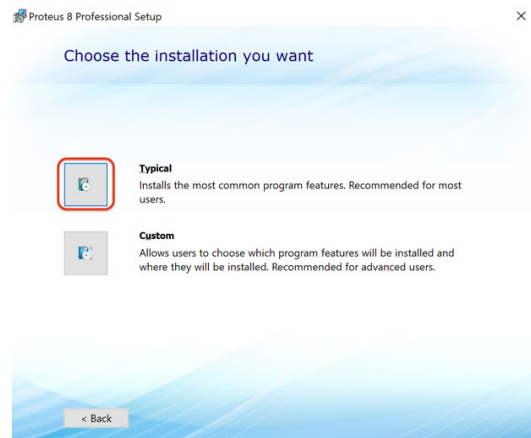

Fig. 3(b): Step 7

Step 7: This will launch the window shown in Fig. 3(b) to select the “Installation Method”. Click “Typical” to start the installation – it will now take a few minutes to install the software.

Step 8: Once the software is installed, the window shown in Fig. 4(a) will launch. Click “Close” to exit. (Note: Launching Proteus from here by clicking “Run Proteus 8 Professional” you may not be presented the “Login Window” discussed in Step 9)

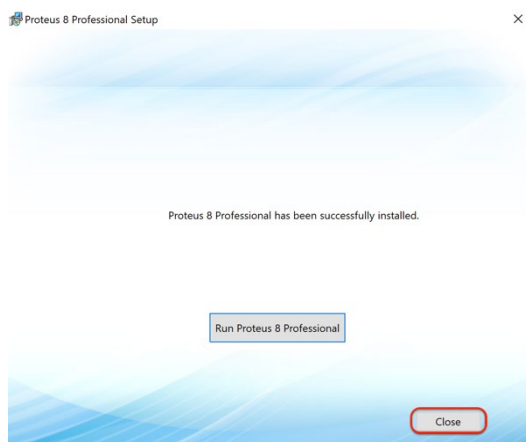

Fig. 4(a): Step 8

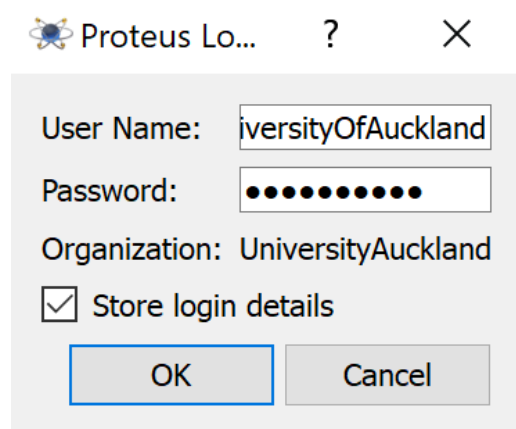

Fig. 4(b): Step 9

Step 9: From Windows Start menu (or the Desktop shortcut) launch Proteus. Before Proteus can start it will ask you to login to use the licenses allocated for your program. Enter the “User Name” and the “Password” provided to you on Canvas. If this is installed in your personal computer, you may tick the checkbox next to “Store login details” so it remembers your login details.

Step 10: To confirm that you are logged in, once Proteus launches, check the “About” field on the bottom left-hand side of your launch screen and make sure it has the UoA license details shown in Fig. 5(a). In some cases, when you initially run Proteus, it may not show the “Login Window” asking for the “User Name” and “Password”. You will see that in the “About” field on the bottom left-hand side of your launch screen says you are using an “Unlicensed” product as shown in Fig. 5(b). In this case, close Proteus and launch the program again. This should bring the “Login Window”.

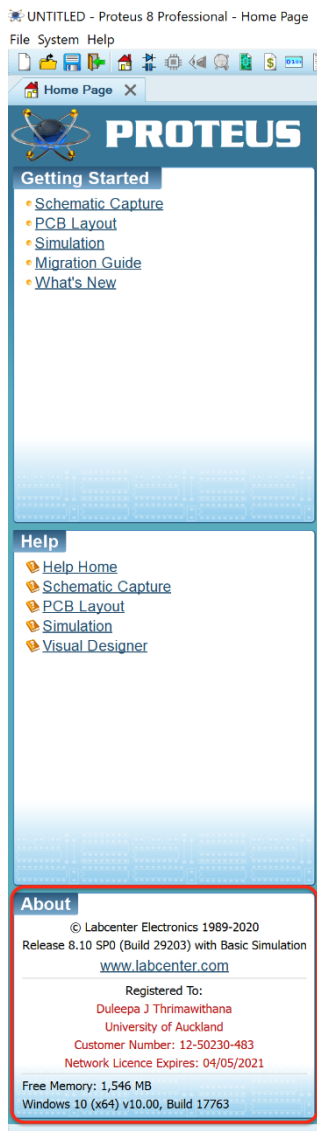

Fig. 5(a): Successful Login

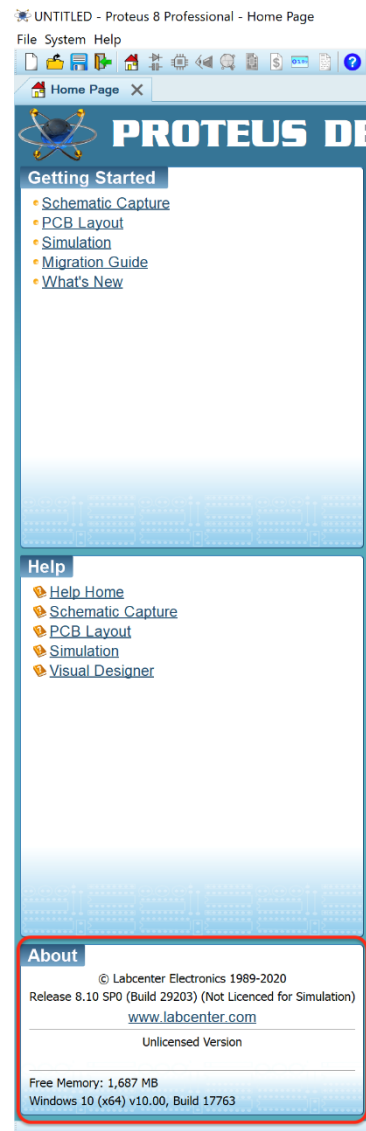

Fig. 5(b): Login Failed

Troubleshooting: If you had entered the incorrect “Server Address” during “Step 5” you will not be able to obtain a license. If this has happened, in the “Login Window”, shown by Fig. 4(b), you will not be able to see “Organization” as “UniversityAuckland”. In this case, you need to correct the “Server Address”, which is stored as an “Environment Variable”. To do this, open “Environment Variables” window by first typing “Environment Variables” in the “Start Menu Search” and then opening “Edit the system environment variables” and finally clicking “Environment Variables” button. Under “System Variables” find the variable “LXKSERVER” and make sure it has the value (check **no** whitespaces or ‘https://’),
